### PROFILE

Information Technology student with a strong aspiration to build a professional identity in the tech industry. Passionate Frontend Developer with hands-on experience in creating responsive web apps using Next.js, TypeScript, and Tailwind CSS. Known for being responsible, organized, and continuously eager to learn and grow.

### PROJECTS

#### 1. Car Rental Website

##### Next.js, TypeScript, Tailwind CSS, Stripe API Chatbot Integration

- Developed a fully responsive car rental platform with light/dark mode support.
  - Integrated Stripe for secure online payments and a chatbot for real-time customer assistance.
  - Implemented user-friendly UI/UX using Tailwind CSS, ensuring seamless vehicle booking flow.
- checkout here: <https://morant-car-rental-market-place-builder.vercel.app/>

#### 2. My Shop - E-commerce Website

##### Next.js, TypeScript, Tailwind CSS

- Built a dynamic shopping website with product detail pages and add-to-cart functionality.
  - Designed responsive layouts and interactive components using Tailwind CSS.
  - Focused on efficient state management and routing using Next.js features.
- checkout here: <https://my-shop-ecommerce-flax.vercel.app/>

#### 3. Resume Builder Web App

##### HTML, CSS, TypeScript

- Created a user-friendly static resume builder that allows users to input details and generate their resume.
  - Used TypeScript to dynamically manage and render user input for personalized resume creation.
  - Ensured clean, printable, and responsive design for all screen sizes.
